

Report Title: 2020 - 2022 IT Strategic Plan

Agency: 601 Department of Health (VDH)

Date: 11/19/2020

Current Operational IT Investments

In this section, describe the high-level strategy the agency will use to manage existing operational IT investments over the next year to 5 years. This section should align with identified Business Requirements for Existing Technology (BReTs). At minimum, please address the following questions in your description of your agency's strategy for managing existing operational IT investments:

Are there existing IT investments that will require additional funding over the next year to 5 years, such as license renewals, re-competition of current IT contracts, or system enhancements required by the Agency Strategic Plan?

If there are systems that will no longer support the agency's business needs, either through poor performance or excessive cost, how does IT leadership in the agency plan to address the issues?

If the agency does not have the staff or funding to meet increasing demand for IT services, how will IT leadership fulfill the requests?

The Virginia Department of Health (VDH) mission is to protect the health and promote the well-being of all people in Virginia. VDH's vision is to become the healthiest state in the nation. Through use of technology applications, the agency is able to identify health trends and target specific populations. The Office of Information Management and Health Information Technology is responsible for administration of these applications, supporting data exchanges and governance, security, testing, and technology procurements review. VDH anticipates additional funding for renewals, and system enhancements from blended fund sources consisting of Federal Grants and locally generated revenue. VDH has invested in data warehouse infrastructure and developing staff skills to take a centralized data management approach for shared data.

The agency has identified its patient management system - Webvision as a system in need of significant enhancement and or moving to a new application which supports the Secretary of Health and Human Resources initiative for collaboration with the Secretary of Administration and the Secretary of Public Safety and Homeland Security, to oversee the development of a statewide integrated electronic health record (EHR) system. VDH has numerous investments that support on-going business needs, healthcare services, disease prevention and emergency programs. Additional details associated with these systems along with all of VDH program areas supported by technology are included in IT Solutions section.

Factors Impacting the Current IT

In this section, the agency will describe the changes in their business environment that will require or mandate changes to the agency's current IT investments. These are requirements and mandates from external sources, such as other agencies or business partners, the agency's customer base, product and service providers, or new federal or state legislation or regulations. The agency must identify the business value of the change, any important deadlines that must be met, and the consequences if the deadlines are not met. In your discussion, be sure to note whether the proposed enhancements are funded or not. If the agency's existing current IT investments will not need enhancement due to requirements or mandates from external sources in the foreseeable future, the agency should enter the following text rather than leave the Factors Impacting the Current IT section blank

For each mandated change, summarize your agency's response from your Agency Strategic Plan, and is it the opinion of agency IT leadership that the IT portion of the response is adequately funded?

Do the mandated changes affect IT in other Commonwealth agencies, or in other states? If so, how?

Executive Order (EO) 19 requiring all agencies to incorporate the use of cloud technologies into Commonwealth information technology service delivery is the leading mandate affecting VDH infrastructure. Significant resources dedicated to preparing applications and updating database platforms in for migrating to a Cloud hosted environment will be costly with funding undetermined. State legislation requiring a workgroup to produce an analysis of the costs and benefits of using the platform provided through Contract Number VA-121107-SMU managed by the Virginia Information Technologies Agency on behalf of the Commonwealth of Virginia in developing and implementing electronic health

records for use by the Virginia Department of Health. It is anticipated that this analysis will generate a requirement for a statewide Electronic Health Record with funding undetermined.

Proposed IT Solutions

In this section, describe the high-level strategy the agency will use to initiate new IT investments over the next year to 5 years in support of the agency strategic objectives documented in your Agency Strategic Plan. The agency does not need to consider specific technologies at this time, however, the strategy should identify how the IT implementation will provide business value to the organization. This section should align with identified Business Requirements for New Technology (BRnTs). At minimum, please address the following questions in your description of your agency's strategy for initiating new IT investments:

What are the most important solutions, based on the priority assigned to the requirements by the business sponsors in your agency, and what is the approach to achieving these priority solutions?

If any new IT initiatives will be started in the upcoming budget biennium, is it the opinion of agency IT leadership that it is adequately funded?

Does the agency's current IT staff have the appropriate skill set needed to support future agency technologies? If not, what skill sets need to be acquired?

If the agency will be engaged in multiple new IT initiatives, how will agency IT staff and agency subject matter experts be used across the initiatives?

I. Application Enhancements, Technology Solutions, and Innovations

Vital Records

- Online user registration enhancements for Electronic Death Registration System (EDRS)
- Create Virginia's electronic Marriage and Divorce Registry. The new system will be fully integrated with the existing Virginia Vital Events and Screening Tracking System (VVESTS) which currently houses the electronic birth, death, and screening registries.
- New VVESTS audit module for periodic review of user access and roles for both internal and external users

Community Health Services

- WebVISION
- Interface with LabCorp
- Immunization Calculation Engine (ICE)

Admin

- Web F&A
- Cardinal Human Capital Management Project
- Leave Management Module and related Time and Effort changes
- Other Enhancements

Epidemiology

- Electronic Data System for Virginia HIV Care and Prevention Data.
- A new system to collect, store, and analyze client-level data for the Division of Disease Prevention (DDP), to include data for the AIDS Drug Assistance Program (ADAP), Ryan White services and other HIV-related data.
- Virginia Electronic Disease Surveillance System (VEDSS) server upgrade, as existing servers are nearing end of life
- MAVEN - VEDSS integration. Expand the use of VEDSS to manage sexually-transmitted disease (STD) investigations
- Redesign and upgrade Lab Management System (LMS) for audit compliance
- Virginia Immunization Information System (VIIS) maintenance, hosting and enhancement project

Family Health Services

- Virginia Early Hearing Detection and Intervention (VA EHDI) program enhancements to existing VISITS (Virginia Infant Screening and Infant Tracking System) module in VVESTS
- Integrate and re-write the existing OFHS's Connection for Children-System Users Network (CCC-SUN) application into

VVESTS

- EWIC and CROSSROADS - New contract
- Microsoft Access system migration (dental activities)
- Virginia Longitudinal Data System (VLDS) - VDH OnboardingHealth Equity
- Replace current Workforce Incentive Program System (WIPS) to meet current business needs
- Emergency Medical Services
- Merge applications from legacy systems to the OEMS Portal
- Provider certifications and training requirements
- Agencies and ambulance license inspection
- Revenue management return to localities

Drinking Water

- Microsoft Access systems migration and data analysis project
- State Drinking Water Information System (SDWIS) to SDWIS Prime EPA Water Quality monitoring
- Transition to Compliance Monitoring Data Portal (CMDP)
- Drinking Water Watch update
- Lead Data Management tool for schools and day cares

Licensure and Certification

- Automation of Long term care, licensing, and certification

Chief Medical Examiner

- Upgrade infrastructure to support operations (network, image server, etc.)
- Update Virginia Medical Examiner Data System (VMEDS) application

II. Informatics, Data Governance Management and Analytics

- Hire Director of Public Health Informatics to implement an agency-wide Informatics Program
- Evaluate Data Warehouse tools to recommend improvements for enterprise-wide solutions
- Establish Enterprise Analytics platform for basic and advanced analytics
- Data integration platform to enable rapid integration and dissemination of data
- Upgrade the Enterprise Geographic Information System (GIS) capabilities
- Build agency-wide Metadata Repository, to include data dictionaries and data lineage
- Establish Interagency Collaboration Framework Oversight committee

III. Infrastructure

- Prepare applications, update database and application server platforms in preparation for migrating to cloud hosted environment to meet Executive Order (EO-19)
- Internet/Wide Area Network (WAN) Bandwidth study
- Workgroup formed to review current network capacity and identify solutions for improving connectivity and speed agency-wide
- The effort includes individual site assessments with review of local options.
- Review and assess current server capacity for future needs
- Introduce "DevSecOps" (Integrating Security Practices with Faster Development and Increased Collaboration) and invest in the appropriate tools
- Develop and implement IT Disaster Recovery (DR) plan
- Standardize database versions to support audit and compliance
- IT Business Services portal to assist districts and offices

IV. Enterprise

- User system access request tracking
- IssueTrak (Tracking issues, EMS/ODW will be early adopters)
- Electronic Health Records (EHR) system
- Performance Management (in progress)
- Content Management (SharePoint)
- Document Management System

- Software management. Enterprise Subscription Licensing and Inventory Management will result in centralized software management model Currently, Tableau and ArcGIS are centrally managed by the Office of Information Management (OIM)
- Review and consolidate VDH's 100+ applications, including 40 sensitive systems
- Migration of File Shares to Centralized/Cloud Model
- Integrate electronic signing of documents without having to print and re-scan (DocuSign)

V. Information Security

- Redesign and enhance the Information Security Portal (ISP)
- Structure the data access governance process
- Source code vulnerability scanning
- Internal and external web application penetration tests

Report Title: Business Requirements For Technology

Agency: 601 Department of Health (VDH)

Date: 11/19/2020

601 VDH BReT Cloud Readiness Assessment 2018 AIDS Drug Assistance Program	
BRT Type:	Business Requirement for Existing Technology
Date Submitted:	1/7/2019
Mandate:	Yes
Mission Critical:	Yes
Description:	
<p>Governor Ralph Northam's "Executive Order 19: Cloud Service Utilization and Readiness" requires agencies to take specific actions starting this month and continuing through fall 2019.</p> <p>The order requires VITA to adopt a model for evaluating and incorporating cloud services into the commonwealth's information technology (IT) strategy and services. VITA has: Started the process of creating a cloud services model Begun obtaining information about agency systems that can be migrated to a cloud environment Provided an overview of the process at the recent agency information technology resources (AITR) meeting Planned additional announcements to AITRs regarding remaining steps Included cloud-related services and migration to the new data center in the recently awarded infrastructure contracts</p> <p>Additionally, VITA and all systems must move from the Commonwealth Enterprise Solutions Center (CESC) in Chester by December of 2021. One related strategy is to reduce the number of physical servicers at CESC to prepare for the move. This means migration to the cloud must be completed by that time. It is imperative to start planning now.</p> <p>Agencies' IT staff members have been asked to complete cloud assessments and should be using the results to identify resource requirements. VITA encourages agencies to evaluate their resources and discuss resource planning with the appropriate financial staff to ensure work can begin as required. Resource needs should be included requests in the upcoming budget cycle.</p> <p>To identify which existing solutions can be migrated to the cloud and ensure all new IT solutions proposed be cloud-enabled, VITA will issue a hosting standard in the coming weeks. This standard will define terminology and identify requirements agencies must consider when implementing cloud-based IT solutions.</p>	
601 VDH BReT Cloud Readiness Assessment 2018 Beach Monitoring and Notification	
BRT Type:	Business Requirement for Existing Technology
Date Submitted:	1/7/2019
Mandate:	Yes
Mission Critical:	Yes
Description:	
<p>Governor Ralph Northam's "Executive Order 19: Cloud Service Utilization and Readiness" requires agencies to take specific actions starting this month and continuing through fall 2019.</p> <p>The order requires VITA to adopt a model for evaluating and incorporating cloud services into the commonwealth's information technology (IT) strategy and services. VITA has: Started the process of creating a cloud services model Begun obtaining information about agency systems that can be migrated to a cloud environment Provided an overview of the process at the recent agency information technology resources (AITR) meeting Planned additional announcements to AITRs regarding remaining steps Included cloud-related services and migration to the new data center in the recently awarded infrastructure contracts</p> <p>Additionally, VITA and all systems must move from the Commonwealth Enterprise Solutions Center (CESC) in Chester by December of 2021. One related strategy is to reduce the number of physical servicers at CESC to prepare for the move.</p>	

This means migration to the cloud must be completed by that time. It is imperative to start planning now.

Agencies' IT staff members have been asked to complete cloud assessments and should be using the results to identify resource requirements. VITA encourages agencies to evaluate their resources and discuss resource planning with the appropriate financial staff to ensure work can begin as required. Resource needs should be included requests in the upcoming budget cycle.

To identify which existing solutions can be migrated to the cloud and ensure all new IT solutions proposed be cloud-enabled, VITA will issue a hosting standard in the coming weeks. This standard will define terminology and identify requirements agencies must consider when implementing cloud-based IT solutions.

601 VDH BReT Cloud Readiness Assessment 2018 Cancer Registry (CRS +)

BRT Type:	Business Requirement for Existing Technology
------------------	--

Date Submitted:	1/7/2019
------------------------	----------

Mandate:	Yes
-----------------	-----

Mission Critical:	Yes
--------------------------	-----

Description:

Governor Ralph Northam's "Executive Order 19: Cloud Service Utilization and Readiness" requires agencies to take specific actions starting this month and continuing through fall 2019.

The order requires VITA to adopt a model for evaluating and incorporating cloud services into the commonwealth's information technology (IT) strategy and services. VITA has:

Started the process of creating a cloud services model

Begun obtaining information about agency systems that can be migrated to a cloud environment

Provided an overview of the process at the recent agency information technology resources (AITR) meeting

Planned additional announcements to AITRs regarding remaining steps

Included cloud-related services and migration to the new data center in the recently awarded infrastructure contracts

Additionally, VITA and all systems must move from the Commonwealth Enterprise Solutions Center (CESC) in Chester by December of 2021. One related strategy is to reduce the number of physical servicers at CESC to prepare for the move. This means migration to the cloud must be completed by that time. It is imperative to start planning now.

Agencies' IT staff members have been asked to complete cloud assessments and should be using the results to identify resource requirements. VITA encourages agencies to evaluate their resources and discuss resource planning with the appropriate financial staff to ensure work can begin as required. Resource needs should be included requests in the upcoming budget cycle.

To identify which existing solutions can be migrated to the cloud and ensure all new IT solutions proposed be cloud-enabled, VITA will issue a hosting standard in the coming weeks. This standard will define terminology and identify requirements agencies must consider when implementing cloud-based IT solutions.

601 VDH BReT Cloud Readiness Assessment 2018 Care Markers

BRT Type:	Business Requirement for Existing Technology
------------------	--

Date Submitted:	1/7/2019
------------------------	----------

Additionally, VITA and all systems must move from the Commonwealth Enterprise Solutions Center (CESC) in Chester by December of 2021. One related strategy is to reduce the number of physical servicers at CESC to prepare for the move. This means migration to the cloud must be completed by that time. It is imperative to start planning now.

Agencies' IT staff members have been asked to complete cloud assessments and should be using the results to identify resource requirements. VITA encourages agencies to evaluate their resources and discuss resource planning with the appropriate financial staff to ensure work can begin as required. Resource needs should be included requests in the upcoming budget cycle.

To identify which existing solutions can be migrated to the cloud and ensure all new IT solutions proposed be cloud-enabled, VITA will issue a hosting standard in the coming weeks. This standard will define terminology and identify requirements agencies must consider when implementing cloud-based IT solutions.

601 VDH BRet Cloud Readiness Assessment 2018 HP Quality Center

BRT Type:	Business Requirement for Existing Technology
Date Submitted:	1/15/2019
Mandate:	Yes
Mission Critical:	Yes

Description:

Governor Ralph Northam's "Executive Order 19: Cloud Service Utilization and Readiness" requires agencies to take specific actions starting this month and continuing through fall 2019.

The order requires VITA to adopt a model for evaluating and incorporating cloud services into the commonwealth's information technology (IT) strategy and services. VITA has:

Started the process of creating a cloud services model

Begun obtaining information about agency systems that can be migrated to a cloud environment

Provided an overview of the process at the recent agency information technology resources (AITR) meeting

Planned additional announcements to AITRs regarding remaining steps

Included cloud-related services and migration to the new data center in the recently awarded infrastructure contracts

Additionally, VITA and all systems must move from the Commonwealth Enterprise Solutions Center (CESC) in Chester by December of 2021. One related strategy is to reduce the number of physical servicers at CESC to prepare for the move. This means migration to the cloud must be completed by that time. It is imperative to start planning now.

Agencies' IT staff members have been asked to complete cloud assessments and should be using the results to identify resource requirements. VITA encourages agencies to evaluate their resources and discuss resource planning with the appropriate financial staff to ensure work can begin as required. Resource needs should be included requests in the upcoming budget cycle.

To identify which existing solutions can be migrated to the cloud and ensure all new IT solutions proposed be cloud-enabled, VITA will issue a hosting standard in the coming weeks. This standard will define terminology and identify requirements agencies must consider when implementing cloud-based IT solutions.

Planned additional announcements to AITRs regarding remaining steps

Included cloud-related services and migration to the new data center in the recently awarded infrastructure contracts

Additionally, VITA and all systems must move from the Commonwealth Enterprise Solutions Center (CESC) in Chester by December of 2021. One related strategy is to reduce the number of physical servers at CESC to prepare for the move.

This means migration to the cloud must be completed by that time. It is imperative to start planning now.

Agencies' IT staff members have been asked to complete cloud assessments and should be using the results to identify resource requirements. VITA encourages agencies to evaluate their resources and discuss resource planning with the appropriate financial staff to ensure work can begin as required. Resource needs should be included requests in the upcoming budget cycle.

To identify which existing solutions can be migrated to the cloud and ensure all new IT solutions proposed be cloud-enabled, VITA will issue a hosting standard in the coming weeks. This standard will define terminology and identify requirements agencies must consider when implementing cloud-based IT solutions.

601 VDH BReT Cloud Readiness Assessment 2018 Virginia Immunization Information System (Vaccine Registry) - (VIIS)

BRT Type:	Business Requirement for Existing Technology
------------------	--

Date Submitted:	1/7/2019
------------------------	----------

Mandate:	Yes
-----------------	-----

Mission Critical:	Yes
--------------------------	-----

Description:

Governor Ralph Northam's "Executive Order 19: Cloud Service Utilization and Readiness" requires agencies to take specific actions starting this month and continuing through fall 2019.

The order requires VITA to adopt a model for evaluating and incorporating cloud services into the commonwealth's information technology (IT) strategy and services. VITA has:

Started the process of creating a cloud services model

Begun obtaining information about agency systems that can be migrated to a cloud environment

Provided an overview of the process at the recent agency information technology resources (AITR) meeting

Planned additional announcements to AITRs regarding remaining steps

Included cloud-related services and migration to the new data center in the recently awarded infrastructure contracts

Additionally, VITA and all systems must move from the Commonwealth Enterprise Solutions Center (CESC) in Chester by December of 2021. One related strategy is to reduce the number of physical servers at CESC to prepare for the move.

This means migration to the cloud must be completed by that time. It is imperative to start planning now.

601 VDH BRnT Fingerprint Fieldprint

BRT Type:	Business Requirement for New Technology
Date Submitted:	2/13/2019
Mandate:	Yes
Mission Critical:	Yes

Description:
 Fieldprint statewide fingerprinting solution will allow all Emergency Medical Services personnel and candidates to submit fingerprints for mandatory criminal history background check conducted through the Central Criminal Records Exchange and the National Crime Investigation Center via the Virginia State Police in a secure approved environment. Services to be obtained via VITA contract VA-170525-FPIC

BReT WebF&A -- Enhancements due to Cardinal

BRT Type:	Business Requirement for Existing Technology
Date Submitted:	7/24/2020
Mandate:	No
Mission Critical:	

Description:
 These are various enhancements to WebF&A which are due to the Cardinal changes.

BReT Black Box Expansion 2020

BRT Type:	Business Requirement for Existing Technology
Date Submitted:	2/27/2020
Mandate:	No
Mission Critical:	No

Description:
 The Black Box matching algorithm is a unique, HIPAA-compliant process developed by Georgetown University that is able to compile surveillance data submitted from multiple jurisdictions and present potential matches among the datasets, as well as summary reports.

BReT CHAAMPS System Maintenance

BRT Type:	Business Requirement for Existing Technology
Date Submitted:	10/19/2020
Mandate:	No

Mission Critical:	Yes
--------------------------	-----

Description:

The Chaamps System is a custom solution that was developed for VDH by Colyar Technology Solutions (CTS). VDH has oversight for the Child and Adult Care Food Program (CACFP). The system maintenance includes:

- Defect corrections
- Software releases for completed Enhancement requests and completed defect fixes
- Phone support for State Agency with CTS as needed (during normal business hours)
- UAT database environment refresh as mutually agreed
- Staff support related to Knowledge Transfer / Non-defect related Assistance (Off-site)
- Software or licensing for software that is specific to the System

BReT Crossroads

BRT Type:	Business Requirement for Existing Technology
------------------	--

Date Submitted:	3/14/2020
------------------------	-----------

Mandate:	Yes
-----------------	-----

Mission Critical:	Yes
--------------------------	-----

Description:

The BRT will provide software maintenance and enhancement services to the Crossroads Users Group for the Crossroads application software. A MAINTENANCE AND ENHANCEMENT CONTRACT(M&E) IS REQUIRED TO CONTINUE WITH THE CROSSROADS PROJECT. THE DEVELOPMENT PHASE HAS CONCLUDED. IN PARTNERSHIP WITH WEST VIRGINIA AND ALABAMA, THE 3 STATE USER GROUP WILL CONTINUE THE JOINT VENTURE. THE M&E CONTRACT WILL ALLOW FUTURE BUSINESS NEEDS TO BE MET. SINCE THEIR IS ONLY 1 SOURCE CODE, A CONTRACTOR MUST MAKE ALL CHANGES TO BE UTILIZED BY ALL. IT IS ALSO EXPECTED THAT OTHER STATES WILL JOIN AS WELL.

BReT FY21 Staff Augmentation Renewal

BRT Type:	Business Requirement for Existing Technology
------------------	--

Date Submitted:	4/29/2020
------------------------	-----------

Mandate:	No
-----------------	----

Mission Critical:	Yes
--------------------------	-----

Description:

FY21 renewal of VDH IT staff augmentation supporting networks systems, data analytics and management. Renewal of services provides agency wide technology infrastructure continuity for key agency communications, intranet, budget, grants, and payroll applications.

BReT IBM for RWHAP B

BRT Type:	Business Requirement for Existing Technology
------------------	--

Date Submitted:	10/19/2020
------------------------	------------

Mandate:	No
-----------------	----

Mission Critical:	Yes
--------------------------	-----

Description:

To secure the services of a qualified contractor to serve as an Insurance Benefits Manager (IBM) for Virginia's Ryan White HIV/AIDS Part B Program (RWHAP B). An IBM is an organization or system that provides administrative and insurance claim adjudication services. An IBM is neither the insurer nor the insured; it simply handles the administration of the plan. The scope of work will have the IBM assist with eligibility determination, insurance enrollment, insurance premium payments and potential cost shares, record keeping/data collection and analysis, create access to provider networks and build relationships with insurance carriers for efficient program operations (including resolution of challenges that affect the performance of the IBM), and coordination of other applicable outreach benefits on behalf of eligible clients enrolled in the Virginia Medication Assistance Program (VA MAP).[VP1] [VP2] The goal is to maintain clients' program eligibility, health insurance coverage, and access to medications by ensuring enrollment of VA MAP eligible clients in an appropriate

insurance coverage option including VA Medicaid and Medicare. This includes enrollments during traditional enrollment periods and special enrollment periods of any insurance option that is available to clients. This also includes making premium payments and any other payments such as tax liabilities in a timely manner to prevent any lapses in coverage due to nonpayment and assures continuity of insurance coverage.

BReT Medical Examiner Network and Storage Upgrades

BRT Type:	Business Requirement for Existing Technology
Date Submitted:	9/12/2019
Mandate:	
Mission Critical:	

Description:

Upgrade the existing network speed, purchase 4 Picture Archiving and Communication Systems (PACS) servers (over the biennium, 2 each year) to store the Computed Tomography (CT), Lodox and conventional x-rays images and to increase storage on the existing photographic image servers.

BReT Software Support Renewal - Oracle

BRT Type:	Business Requirement for Existing Technology
Date Submitted:	4/22/2020
Mandate:	No
Mission Critical:	Yes

Description:

This BReT is for the purchase for the yearly Oracle software support renewal. This support renewal provides technical support and software upgrades for all Oracle products used in development and maintenance of applications used in VDH programs and Health Districts.

BReT VDH Software Support Renewal - Tableau

BRT Type:	Business Requirement for Existing Technology
Date Submitted:	4/10/2020
Mandate:	Yes
Mission Critical:	Yes

Description:

Tableau is an existing solution used extensively by our data analysts and our entire data visualization/analysis/BI reporting platforms utilize Tableau.

If we do not renew our Tableau Desktop/Server and Data Management licenses:

1. Our data analysts will have to revert to manual analysis
2. Collaboration efforts for data sources/visualizations will be impacted.
3. Our internal and external data portals will be impacted.
4. Tableau is also key to our data modernization related grants.
5. Key internal (CHS Dashboards, DASH, etc.) and external (Opioid, COVID-19 etc.) data dissemination efforts will be impacted.
6. All instances of making near-real time data available will be impacted.
7. Data discover and preparation efforts will revert to a silo approach.

BReT VDH/IVPP Education Video/Blog Landing Page

BRT Type:	Business Requirement for Existing Technology
Date Submitted:	10/1/2020
Mandate:	No
Mission Critical:	No

Description:

VDH/IVPP is tasked with providing informational/educational programs for providers of healthcare services in the state of Virginia. The Website Group (WSG) is the recipient of a federal grant administered by the Virginia Department of Health (VDH) to support its mission to "promote safe practices and the prevention of injury and violence amongst the commonwealth's residents while providing timely and essential information to healthcare providers."

To fulfil this need, Daly/NCV will produce all required web-based video and blog content deliverables provided by VDH/IVPP to DCI/NCV.

Requirements

1. Designing and programing an effective and responsive professional website to include both video playback and expert blogging functionality.
2. Designing and scripting informative video presentations of up to 5 minute each for each educational presentation requested by VDH/IVPP, featuring a professional voice/on-camera narrator to be used in all informational and educational presentations across the entire project series.
3. Recording high quality instructional presentation portions of the informational/educational videos.
4. Reformatting client provided visual elements of informational/educational presentations and/or articles into standard and consistent display form featuring a common layout and design theme throughout all informational and educational presentations in the entire project series.

BReT WIC EBT

BRT Type:	Business Requirement for Existing Technology
------------------	--

Date Submitted:	2/24/2020
------------------------	-----------

Mandate:	Yes
-----------------	-----

Mission Critical:	Yes
--------------------------	-----

Description:

To acquire the services of a qualified online WIC EBT Service Provider to transfer their WIC EBT system to the Virginia Special Supplemental Nutrition Program for Women, Infants and Children (WIC). Services include the materials, software and hardware needed to support WIC EBT, as described within this RFP. The Commonwealth will be contracting with a single online WIC EBT Service Provider.

BReT_FY21 Staff Augmentation - Internal Audit

BRT Type:	Business Requirement for Existing Technology
------------------	--

Date Submitted:	9/10/2020
------------------------	-----------

Mandate:	No
-----------------	----

Mission Critical:	
--------------------------	--

Description:

Due to staff turnover in the Office of Internal Audit's IT Department, VDH Office of Internal Audit require auditing of 14 systems in accordance with the FY19 and FY20 IT Audit Plan on file with VITA.

The data owners, system owners, and VDH's Office of Compliance and Security have identified these systems as sensitive. As such, the Commonwealth's IT Security Standard requires a SEC501 IT Security Compliance audit once every three years.

VDH requires final audit deliverables by June 30, 2021.

Bret-Mobile platform and monitoring visits (retail stores) - VA WIC Program

BRT Type:	Business Requirement for Existing Technology
------------------	--

Date Submitted:	1/28/2015
------------------------	-----------

Mandate:	Yes
-----------------	-----

Mission Critical:	
--------------------------	--

Description:

MODIFY AN EXISTING CONTRACT WITH XEROX CORPORATION TO INCLUDE MAKING CHANGES TO AN EXISTING (APL CENTRAL) SYSTEM WHICH IS USED TO DOCUMENT MONITORING/STOCKING VISIT RESULTS COMPLETED AT 850+ WIC AUTHORIZED STORES BY STATE AGENCY STAFF. COMPLY WITH STATE 12VAC-195-580 PERFORMANCE AND ADMINISTRATIVE MONITORING AND FEDERAL REGULATIONS (246.12) IN CONDUCTING UNANNOUNCED VISITS AT WIC AUTHORIZED STORES AND NEW STORE APPLICANTS.

BRnT - ODW GEC Project

BRT Type:	Business Requirement for New Technology
Date Submitted:	9/9/2019
Mandate:	No
Mission Critical:	Yes

Description:

Global Environment Consulting (GEC) will provide Virginia Department of Health (VDH) Office of Drinking Water (ODW) a combination of software solutions (GECSWS), data migration from existing legacy systems, and custom software development. This project will include a full System and Secure Development Lifecycle.

The following systems are included in GECSWS:

Safe Water Information Field Tool (SWIFT Surveys)

Safe Water Information Management and Reporting (SWIMR-Web, including SWIMR Buddy)

Safe Water Engineering Project Tracking (SWEPT) (including legacy data migration)

The following data migration and customization tasks:

Legacy data migration and customized user interface

Reports customization for SWIMR system

BRnT Buoy Health

BRT Type:	Business Requirement for New Technology
Date Submitted:	4/24/2020
Mandate:	No
Mission Critical:	Yes

Description:

Buoy Health is an artificial intelligence-driven digital assistant that helps patients self-diagnose and triage to the appropriate care. Buoy will connect people with the appropriate health care resource based on your symptoms and risk factors for COVID-19.

BRnT Carahsoft

BRT Type:	Business Requirement for New Technology
Date Submitted:	5/22/2020
Mandate:	No
Mission Critical:	Yes

Description:

This BRnT supports the deployment of a mobile application which includes exposure notifications and processes the proximity tracking data in Google Cloud for advanced analytics.

Once in production, the environment will support the following functions:

1. Mobile application native to iOS and Android;
2. Data ingestion of mobile upload data to Google Cloud;
3. Virtual agent setup for follow up with exposed users
4. Setup of Data warehouse in Google Cloud; and
5. Access to the collected data to VDH team

BRnT Integrated HIV Care and Prevention Data System-ADAP

BRT Type:	Business Requirement for New Technology
Date Submitted:	7/24/2020
Mandate:	No
Mission Critical:	Yes

Description:

An automated system for the Virginia AIDS Drug Assistance Program (ADAP) that will manage all client-level data related to program applications, eligibility, recertification, medication utilization and insurance coverage for approximately 7000 clients. The system will interface with the state's Pharmacy Benefits Manager and Third Party Payer for payments of insurance premiums and co-payments for insured clients. The system will interface with COV Central Pharmacy Data system (QS1), 2 health department pharmacies, Medical College of Virginia, and all other health departments / medication pick-up sites for clients through direct medication purchase.

BRnT VDH Health Network Platform

BRT Type:	Business Requirement for New Technology
Date Submitted:	10/27/2020
Mandate:	No
Mission Critical:	Yes

Description:

VDH is looking for a flexible and scalable network that provides both citizen access to the services they need and a platform for all network partners to track each individual's health journey, sharing critical information to enable a more comprehensive approach. This IT platform is designed to link vulnerable members of society to needed social services to aid the Commonwealth in its response to and recovery from the COVID 19 pandemic. This network can be integrated with health system electronic medical records, allowing clinical care providers to directly refer patients to social services organizations to meet their needs and improve overall health outcomes.

Report Title: IT Strategic Plan Budget Tables

Agency: 601 Department of Health (VDH)

Date: 11/19/2020

Current IT Services				
	Costs Year 1		Costs Year 2

Integrated HIV Care and Prevention Data System-ADAP			
Oversight and Governance Category: Category 1: High/High		Project Initiation Approval	

The purpose of this project is to develop and implement an integrated HIV Care and Prevention Data System to manage all data related to the Ryan White Care Program, including the AIDS Drug Assistance Program (ADAP), HIV Care Services, and the HIV Prevention Program.

Planned Project Start Date: 9/1/2020	Planned Project End Date: 7/28/2021
--------------------------------------	-------------------------------------

Estimated Costs:	Total	General Fund	Nongeneral Fund
Project Cost	\$1,408,535.54	\$0.00	\$1,408,535.54
Estimated project expenditures first year of biennium:	\$845,205.65	\$0.00	\$845,205.65
Estimated project expenditures second year of biennium:	\$331,948.15	\$0.00	\$331,948.15

Project Related Procurements

Integrated HIV Care and Prevention Data System-ADAP - Procurement

Initiate a RFP for development of an automated system for the Virginia AIDS Drug Assistance Program (ADAP) that will manage all client-level data related to program applications, eligibility, recertification, medication utilization and insurance coverage for approximately 7000 clients. The system will interface with the state's Pharmacy Benefits Manager and Third Party Payer for payments of insurance premiums and co-payments for insured clients. The system will interface with COV Central Pharmacy Data system (QS1), 2 health department pharmacies, Medical College of Virginia, and all other health departments / medication pick-up sites for clients through direct medication purchase.

Crossroads Procurement

To provide software maintenance and enhancement services to the Crossroads Users Group for the Crossroads application software.

Report Title: IT Strategic Plan Procurements

Agency: 601 Department of Health (VDH)

Date: 11/19/2020

Stand Alone Procurements:	
Procurement Name:	DPHP Kognito
Procurement Description:	Online training courseware for simulation-based suicide prevention training programs where learners engage in role-play conversations with emotionally responsive avatars that exhibit signs of depression, thoughts of suicide, and anxiety.
Procurement Date:	8/1/2018 Multiyear Contract
Procurement Name:	FY21 Staff Augmentation Renewal Procurement - Non-General Funding
Procurement Description:	FY21 renewal of VDH IT staff augmentation supporting networks systems, data analytics and management. Renewal of services provides agency wide technology infrastructure continuity for key agency communications, intranet, budget, grants, and payroll applications.
Procurement Date:	6/30/2020
Procurement Name:	IBM for RWHAP B Procurement
Procurement Description:	To secure the services of a qualified contractor to serve as an Insurance Benefits Manager (IBM) for Virginia's Ryan White HIV/AIDS Part B Program (RWHAP B). An IBM is an organization or system that provides administrative and insurance claim adjudication services. An IBM is neither the insurer nor the insured; it simply handles the administration of the plan. The scope of work will have the IBM assist with eligibility determination, insurance enrollment, insurance premium payments and potential cost shares, record keeping/data collection and analysis, create access to provider networks and build relationships with insurance carriers for efficient program operations (including resolution of challenges that affect the performance of the IBM), and coordination of other applicable outreach benefits on behalf of eligible clients enrolled in the Virginia Medication Assistance Program (VA MAP).[VP1] [VP2] The goal is to maintain clients' program eligibility, health insurance coverage, and access to medications by ensuring enrollment of VA MAP eligible clients in an appropriate insurance coverage option including VA Medicaid and Medicare. This includes enrollments during traditional enrollment periods and special enrollment periods of any insurance option that is available to clients. This also includes making premium payments and any other payments such as tax liabilities in a timely manner to prevent any lapses in coverage due to nonpayment and assures continuity of insurance coverage.
Procurement Date:	3/26/2026
Procurement Name:	VDH Fingerprint Fieldprint Procurement
Procurement Description:	Fieldprint statewide fingerprinting solution will allow all Emergency Medical Services personnel and candidates to submit fingerprints for mandatory criminal history background check conducted through the Central Criminal Records Exchange and the National Crime Investigation Center via the Virginia State Police in a secure approved environment. Services to be obtained via VITA contract VA-170525-FPIC. VDH/OEMS will be paying all costs associated with every applicant and background check. This includes all fees to VSP and Fieldprints administration costs as well as any applicable fees. Funding is revenue based.
Procurement Date:	4/1/2019 Multiyear Contract

Procurement Name:	VDH Health Network Platform Procurement
Procurement Description:	VDH is looking for a flexible and scalable network that provides both citizen access to the services they need and a platform for all network partners to track each individual's health journey, sharing critical information to enable a more comprehensive approach. This network can be integrated with health system electronic medical records, allowing clinical care providers to directly refer patients to social services organizations to meet their needs and improve overall health outcomes. As such, it represents an equity based population health solution to the crisis and a critical investment in public health infrastructure that will substantially benefit the Commonwealth's recovery from the pandemic.
Procurement Date:	10/27/2020
Procurement Name:	WIC EBT Procurement - Contract Extension FY 21
Procurement Description:	Conduent State and Local Solution Inc. have been providing WIC EBT electronic benefit transfer (EBT) services to approximately 118,000 WIC participants in the Commonwealth since 2013. On April 23, 2020, the current service contract with Conduent was extended for another 6 months beginning May 1 until October 31, 2020. During the RFP process, the existing contract will need to be extended to provide services until a new vendor is selected and system is implemented. The contract extension is for FY21- 11/1/2020-10/31/2021 and FY22- 11/1/2021-10/31/2022.
Procurement Date:	11/1/2020
Procurement Name:	Black Box Expansion 2020 Procurement
Procurement Description:	The Black Box matching algorithm is a unique, HIPAA-compliant process developed by Georgetown University that is able to compile surveillance data submitted from multiple jurisdictions and present potential matches among the datasets, as well as summary reports.
Procurement Date:	2/27/2020
Procurement Name:	Buoy Health Procurement
Procurement Description:	Buoy Health is an artificial intelligence-driven digital assistant that helps patients self-diagnose and triage to the appropriate care. Buoy will connect people with the appropriate health care resource based on your symptoms and risk factors for COVID-19. Citizens will connect to the Buoy application from home. VITA has stated the ECOS is not required.
Procurement Date:	4/24/2020
Procurement Name:	Carahsoft Procurement
Procurement Description:	The objective of this procurement is to deploy the mobile application which includes exposure notifications and processes the proximity tracking data in Google Cloud for advanced analytics. Once in production, the environment will support the following functions: 1. Mobile application native to iOS and Android; 2. Data ingestion of mobile upload data to Google Cloud; 3. Virtual agent setup for follow up with exposed users 4. Setup of Data warehouse in Google Cloud; and 5. Access to the collected data to VDH team

Procurement Date:	5/22/2020
Procurement Name:	CHAAMPS System Maintenance Procurement
Procurement Description:	<p>The Chaamps System is a custom solution that was developed for VDH by Colyar Technology Solutions (CTS). VDH has oversight for the Child and Adult Care Food Program (CACFP). The system maintenance includes:</p> <ul style="list-style-type: none"> · Defect corrections · Software releases for completed Enhancement requests and completed defect fixes · Phone support for State Agency with CTS as needed (during normal business hours) · UAT database environment refresh as mutually agreed · Staff support related to Knowledge Transfer / Non-defect related Assistance (Off-site) · Software or licensing for software that is specific to the System
Procurement Date:	10/19/2020
Procurement Name:	FY21 Staff Augmentation Procurement - Internal Audit
Procurement Description:	Due to staff turnover in the Office of Internal Audit's IT Department, VDH Office of Internal Audit require auditing of 14 systems in accordance with the FY19 and FY20 IT Audit Plan on file with VITA.
Procurement Date:	9/10/2020
Procurement Name:	FY21 Staff Augmentation Renewal Procurement - General Funding
Procurement Description:	FY21 renewal of VDH IT staff augmentation supporting networks systems, data analytics and management. Renewal of services provides agency wide technology infrastructure continuity for key agency communications, intranet, budget, grants, and payroll applications.
Procurement Date:	6/30/2021
Procurement Name:	Oracle Procurement
Procurement Description:	VDH provides technical support and software upgrades for all Oracle products used in development and maintenance of applications used in VDH programs and Health Districts. Oracle supports a broad range of agency applications that includes critical citizen healthcare applications, data management, and Commonwealth finance system, Cardinal.
Procurement Date:	4/22/2020
Procurement Name:	Tableau Procurement
Procurement Description:	Tableau is an existing solution used extensively by our data analysts and our entire data visualization/analysis/BI reporting platforms utilize Tableau.
Procurement Date:	4/10/2020
Procurement Name:	VDH/IVPP Education Video/Blog Landing Page Procurement
Procurement Description:	VDH/IVPP is tasked with providing informational/educational programs for providers of healthcare services
