

PSAP Grant Program Grant Ranker

View Application--25--Voice Recorder replacement

Grant Period: 2010

Tier: Replacement of non-vendor supported wireless E-911 equipment or service to enable primary PSAP to maintain current service levels to the general public (**NON-VENDOR SUPPORTED**)

Grant Program: Continuity and Consolidation **Grant Type:** Individual PSAP

Priority: Voice Recorders and logging system (**VOICE**)

Primary PSAP Applicants: Warrenton - Fauquier Joint Communications Center

Jurisdictions Served: Fauquier, County of
Warrenton, Town of

Project Director:

Timothy McMenamin

Director

78 West Lee St. Warrenton, Va. 20186

Project Description:

Total Project Cost \$338,939.00

Amount Requested: \$150,000.00

Statement of Need:

We were notified by NICE Inc. that as of March 1, 2010 they will no longer support our Dictaphone Freedom Call logging recorder. The replacement of non-supported E9-1-1 equipment is listed as a high priority item on VITA's wireless 9-1-1 grant programs. With the condition of the economy and state and local governments being forced to enact budget reductions the only way we will be able to replace this system is through grant assistance. We have been instructed to submit our FY 2010 budgets as a NO GROWTH budget. We have requested replacement of this system through our County Capital Improvement Plan for FY2010. If we receive this grant the balance for the County will be \$188,939, even getting this amount from the General fund will be a hardship on our County at this time. We do make an additional plea at this time that if for some reason there were extra funds available through this program that we be considered for addition funding above the maximum \$150,000.

Comprehensive Project Description:

The goals and objectives for this grant are very simple. To replace our existing Dictaphone voice recording system with a new system. Our only reason for this replacement is the fact that NICE has advised us that they will no longer support this equipment after March 1, 2010. Activities to accomplish this project are. 1. receive tentative funding approval from county CIP committee. (Dec 2008) 2. Receive grant approval from wireless 9-1-1 grant. (spring 09) 3. During 1st qtr FY 2010 complete bid process as per County policy. 4.

2nd Qtr 2010 award contract to vendor 3. 3rd Qtr 2010 (before March 1, 2010 have new equipment installed, tested and accepted. The longeveity of this project is hard to predict with the advances in technology, but I would hop this system will be the last recording system I purchase before my retirement (10 years + or-)

How will the equipment purchased will support future technologies for PSAP readiness?:

We are very mindful of the fast pace change in technologies today. The system we desire to spec will be NG9-1-1 ready, capable of full integration not only with our CPE and radio system but also with our CAD where text, photo, and video files will be integrated completely.

Budget and Budget Narrative:

Please see attached NICE Inc. budget quote for a 72 channel completely redundant voice logging system.

Evaluation:

Since this is an equipment replacement and not a program per say. The evaluation will simply be was the legacy system replaced, and does the new system meet our needs.

System Description (Narrative Description of Proposed Solution)																									
<p>Parallel NiceLog recording system configured with 64 channels to provide recording of 25 analog lines, 6 call taker positions (phone and select audio), 24 LORI/LOMI channels, plus 8 channels for over-the-air frequencies for trunked radio. NiceLog includes RAID 5 hard drives for added resiliency. Control channel captured over-the-air to provide de-trunking on replay, control channel data being captured on parallel CLS servers. Applications include 3 copies of Inform Reconstruction & Organizer, 6 Last Message Replay and ANI/ALI Integration.</p>
