Project Description:

Total Project Cost \$9,400.00

Amount Requested: \$9,400.00

Statement of Need:

The Martinsville-Henry County Joint 911 Center is supported by mapping departments from both the City of Martinsville and County of Henry. The City of Martinsville has a plotter in their mapping department that is heavily used for providing images in support of PSAP operations. This plotter is the only large format plotter in the City of Martinsville and is technically outdated and in desperate need of replacement. With the current economic situation in the City of Martinsville, rating the highest in the Commonwealth in unemployment, the City has no financial resource to purchase a replacement plotter. Without the replacement of this aging plotter, the City of Martinsville is faced with losing the ability to provide quality images for our PSAP operations.

Comprehensive Project Description:

The Martinsville-Henry County 911 Center is requesting grant funds to purchase an HP DesignJet T1100ps plotter to replace an aging, heavily used, technically outdated plotter. The current plotter is the only large format plotter in the Martinsville Mapping Department and is in need of replacement. It has been in place for over four years and is losing the quality of printing. The current plotter is used in support of 911 Operations and provides our PSAP with images and data for the agencies we serve and the proposed replacement will continue to do the same.

How will the equipment purchased will support future technologies for PSAP readiness?:

With the ability to purchase a new state of the art plotter, the Martinsville-Henry County 911 Center will have access to quality images and data provided from the Martinsville Mapping Department. These images will provide our PSAP with a tool to be used in daily operations and for future technologies.

Budget and Budget Narrative:

Itemized Cost Schedule \$6,800.00 - Purchase one (1) HP DesignJet T1100ps Plotter. \$1,600.00 - HP 5yr Support (UG725E) \$1,000.00 - Installation, wiring, other expenses related to the implementation of this plotter. Total Requested \$9,400.00

Evaluation:

This project will be measured for achievement and success by the ability of our PSAP to receive quality images and data provided by the Martinsville Mapping Department. These images and data will be used in daily PSAP operations to assist the agencies and citizens we serve.
