Project Description:

Total Project Cost \$70,000.00

Amount Requested: \$70,000.00

Statement of Need:

Scott County 9-1-1 is in need of funding to maintain our level of service to the Wireless and Wireline 9-1-1 community. Our recent budget was cut this current fiscal year so drastically that the 9-1-1 charges had to be rejustified as to why we are required to have enhanced 9-1-1. A delay in payment for the 9-1-1 trunk lines occurred but fortunatly the LEC's did not disrupt services while this occurred. By not receiving funding potential diruption to the minimal components of a PSAP could suffer drastically.

Comprehensive Project Description:

This project goal and objective is a combination of various smaller projects to provide for the continuity of services and to enhance the function of the PSAP in relation to handling Wireless 9-1-1 calls. The strategy to accomplish the continuity of services is to Upgrade our existing CAD to meet the recommendations of the vendor that are in agreement with the 9-1-1 department. This project will include the necessary hardware, support and services to provide consistant level of services for our citizens and responders.

How will the equipment purchased will support future technologies for PSAP readiness?:

The equipment purchased will be state of the art and in compliance with the latest NENA standards and prepare the center to adjust to upcoming technologies while maintaining current level of services.

Budget and Budget Narrative:

Southern Software CAD system upgrade and 5 year warranty as in attached quote. CAD - CPU & monitor

replacements \$2,275 each \$9,100

Evaluation:

The evaluation will be conducted by the successful acquisition and implementation of equipment and services acquired. Evaluation of each individual component will include testing and operation to insure the continuity of services.
