Project Description:

Total Project Cost \$26,440.00

Amount Requested: \$26,440.00

Statement of Need:

We are requesting this equipment replacement assistance from the wireless board under the current Continuity and Consolidation Priorities. Our PSAP is a consolidated PSAP with three jurisdictions. Because of the current fiscal crisis we do not have the funding to make this equipment upgrade.

Comprehensive Project Description:

The goal of the ECC is to purchase 10 Zetron Model 3022 tabletop call check voice recorders to replace the existing ones that are outdated and can no longer be serviced or covered by a maintenance contract. These devices are used by communications staff to quick check and replay conversations with field personnel when their transmissions are unreadable. If this grant request is approved we will purchase this equipment from a local vendor and have them installed. The projected timeline is 90 days from receipt of grant funding. It has always been our approach that this equipment is utilized as protection of our field personnel.

How will the equipment purchased will support future technologies for PSAP readiness?:

This equipment will replace old equipment already in use by our communications staff.

Budget and Budget Narrative:

10 - Zetron Model 3022 \$21,800, 10 - Desktop Adapters \$2,800, 20 - Blank Panel - \$400, Installation of

equipment - \$1,440, Total budget request is \$26,440

Evaluation:

Once the equipment is installed we will develop a report back to the wireless board advising the old equipment has been removed and the project is complete.
