### Project Description:

**Total Project Cost** \$150,000.00

**Amount Requested:** \$150,000.00

### Statement of Need:

Replace 4 position CPE and mapping system that our vendor, Plant/CML has indicated will not be supported after July 1, 2009. CPE is a Palladium product that was formerly part of TCI which was acquired by Plant/CML. System has an integrated mapping system (911 mapping) that may be able to be integrated into a new CPE. (911 Mapping Inc has indicated that their software is still be developed and maintained and can be used with multiple vendors CPE's)

### Comprehensive Project Description:

Replace an outdated CPE that will not be supported after 7/1/09. This project will include necessary procurement practices and will be procured and installed as soon as possible after notification of the grant award.

### How will the equipment purchased will support future technologies for PSAP readiness?:

Would prefer to acquire a system that is next generation ready but that may be cost prohibitive based upon budget constraints. A system that is upgradable would be preferred.

### Budget and Budget Narrative:

A quote has not been obtained at this time as I have been working with my vendor to determine next steps. The former vendor, TCI, was acquired by Plant CML and I was informed of their decision to discontinue support in July of this year and I am awaiting responses from Plant/CML regarding alternatives

that I may have. Please note that there are no local funds available to support this acquisition and this projected is based solely on receipt of this grant. If the total project cost comes in at less the the amount requested additional funds may be applied to a multi year maintence contract or returned to VITA. Please note that I am applying for two seperate grants, one for CPE and one for CAD. Our CAD vendor has indicated that they will no loger be developing our product and that support for our existing product may be limited. I realize that current rules allow for only one grant application per grant period from a PSAP but I am respectfully requesting a variance from that practice. If only one project can be funded the CPE project takes priority.

**Evaluation:**

Post installation system checks to determine full system functionality prior to payment for equipment.
