Project Description:

Total Project Cost \$140,000.00

Amount Requested: \$140,000.00

Statement of Need:

As the Greene County representative, I serve as the 911 Operations Manager. At this time the Communications Center is operating 4 Zetron consoles with a approx. age of 6 to 7 years old. The current vendor is Clear Communications of Motorola which was brought on board in 2008. At this time Clear has revised and upgraded the radio infrastructure including Portables, Mobiles and Antennas, however, Radio Consoles were not part of the upgrade due to the fact of the financial restraints of the County. The current condition and age of the consoles makes it very difficult to receive parts and technical support. At this time the countywide radio infrastructure is Motorola except the console which prohibits the radio vendor to provide a quality service. At this time, it would be impossible for the County to replace the consoles due to the current fiscal situation. Receiving the funding would allow the County to have one vendor and one product that works hand and hand.

Comprehensive Project Description:

The replacement of 4 Zetron with 4 new Gold Elite Motorola consoles. If the County was awarded the funding the vendor has the consoles in stock and could be ordered by the County shortly after July 2009. The vendor would deliver the new consoles and install shortly thereafter. The projected longevity on this product is about 10 years.

How will the equipment purchased will support future technologies for PSAP readiness?:

The purchase would bring the County Radio infrastructure up to current technology to enable the best possible communication with responders to serve the community.

Budget and Budget Narrative:

Please reference the attached quote from the vendor. Note that the quote is for \$128,500.00, however \$11,500.00 in additional funds are requested to cover any future costs between now and July 2009, for a total grant request of \$140,000.00. The County understands that any funding not used would be returned to the Wireless Services Board.

Evaluation:

The successful installation and communication through the new consoles would constitute a SUCCESS for the future of this County.
