

# Onboarding Inova

HITSAC Presentation

October 18, 2012

# Why Inova?

Inova is a not-for-profit health care system serving more than two million people per year. We are a comprehensive network of health services including:

- Hospitals
- Emergency and urgent care centers
- Physician therapy centers
- Home health care
- Behavioral and mental health services
- Blood donor services
- Long-term and assisted living facilities
- Community outreach programs and clinics
- Physician practices

• Home Care visits:	81,541
• Nurses:	4,385
• Affiliated physicians:	3,720
• Employees:	12,963
• Inpatient admissions:	96,849
• Births:	20,136
• Emergency room visits:	391,809
• Outpatient visits:	538,957

# Why now?

- Inova was an early adopter of HIE as a key strategy
- Inova has a database with rich clinical data from years of implementing clinical technologies:
  - Inpatient EMR (*since 1993*)
  - CPOE
  - eICU
  - Pharmacy Automation
  - Ancillary Systems: RAD, LAB, PACS, ED
- Inova is implementing EpicCare: inpatient, ambulatory and revenue cycle:
  - More than 55 ambulatory (outpatient) sites are currently live on EpicCare.
  - Hospitals (inpatient) will be implemented in phases, beginning in November 2012 through June 2013.

- Implementation Strategy:
  - ConnectVirginia is being configured as a node in Inova's Care Everywhere implementation.
  - EpicCare will supply and manage the Continuity of Care Document (CCD).
  - The Epic 'model' is being maintained so future EpicCare nodes can stand up their connections with as little effort as possible.

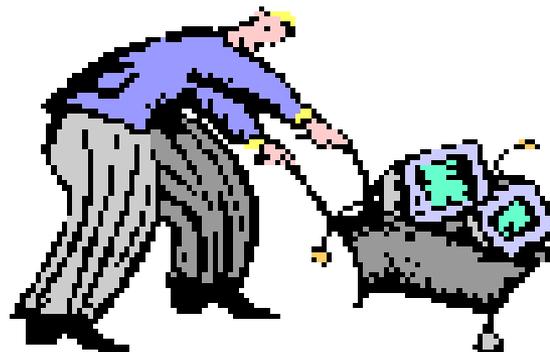

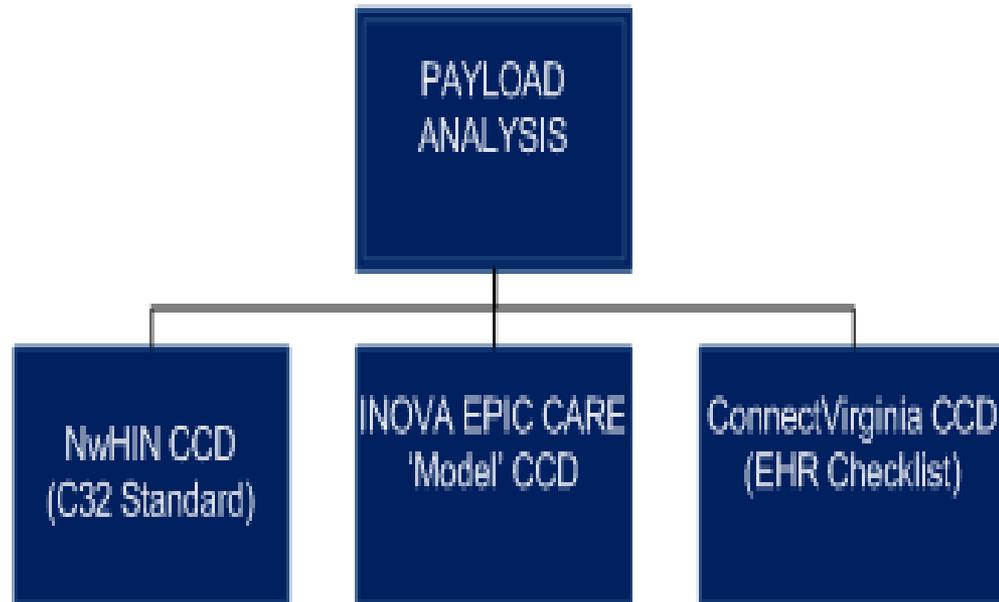

**ConnectVirginia**  
Advancing Virginia's Health Care

- ConnectVirginia Implementation Tools provide the following information to each node:
  - Scope of work at each phase of the project
  - Resource requirements for the overall project
  - Project timeline
  - Project deliverables

- EPIC v.2010 supports NwHIN 2010 specs  
ConnectVirginia supports NwHIN 2012 specs
- Example of gaps between the two specs:
  - SAML tokens: The older version refers to 'purpose for use' the newer version uses 'purpose of use'.
  - Epic's 'model' uses 'StatusTYPE:DeferredCreation' which is NOT the default in ConnectVirginia's current configuration.
- Both Epic and Inova technical teams are very committed to developing solutions that can be replicated and adapted by other prospective nodes.

# Technical Trailblazing

- Inova and ConnectVirginia partnering on OPT-in strategy
- Inova Team consists of representatives from:
  - Public Relations
  - Relationships & Growth
  - Physician Communications
  - Marketing
- Key project deliverable: Communications Plan

# Inova's Timeline
