

IS Council – IS Conference

April 3, 2013

Attendees:

Shirley Payne
Bradley Paul
Chandos Carrow
Ray Usler
Chandra Barnes
Rosario Igharas
Joe Hubbell
Deborah Edwards
Marcie Stidham
Mike MacEwen
Andrew Hall
Chuck Ross

Absent

Maurion Edwards
Steve Thomas
Dan Han
Ed Miller CSRM Support
Tina Harris CSRM Support

Speakers:

The committee prioritized a list of keynote speakers. The strategy is to attract a non-local person for the keynote address and solicit local people on the list for some of the breakout sessions. There will also be time set aside in the program for Mike Watson to address all conference participants. The committee discussed how all speakers must provide solutions to COV issues/problems not Ivory tower presentations. Also discussed how at this conference, in order to better ensure participation and interest, we are going to push all presenters to speak at an educated level, and not at a 101 entry level (e.g. Defining what "Cloud Computing" is). It was also brought up that multiple formats of delivery of content would be effective (i.e. Panel Discussions, Lightning Rounds, Point Counter Point discussions, etc.). We have asked that Ed Miller come up with some executive level charted graphics illustrating the survey results for both the ISO's and the AITR's. We are going to compare these charts to the information presented above at subsequent meetings to ensure that we are on the right track and effectively meeting our customers demand.

Breakout Session Ideas:

The committee identified breakout session topics. Andy Hallberg will organize the identified breakout sessions topics into program tracks. He will share this information at the next meeting.

SANS Training Courses:

The committee prioritized a list of proposed SANS training courses.

Technical Course Suggestions:

1. [Metasploit Kung Fu for Enterprise Pen Testing](#) (SEC580) – **Priority #2**
2. [Mobile Device Security](#) (SEC571) - **Priority #1**
3. [Cloud Security Fundamentals](#) (SEC524)
4. [Virtualization Security Fundamentals](#) (SEC577)

5. [Twenty Critical Security Controls](#) (SEC440, AUD440) – **Priority #3**

Management Course Suggestions:

1. [Technical Communication and Presentation Skills for Security Professionals](#) (MGT305)
2. [A Practical Introduction to Risk Assessment](#) (MGT415)
3. [Information Security for the Business Executive](#) (MGT432) – **Priority #2**
4. [IT Security Strategic Planning](#) (MGT520) – **Priority #1**

Next Step:

The committee has agreed to meet in person on May 1, from 10am to noon prior to the ISOAG meeting. Following the May meeting, the committee will meet in person every other month until all conference planning is completed.
